FACE, NECK AND DÉCOLLETÉ SERUM
LIPOREPAIR UP GRAVITY
SNAIL SECRETION FILTRATE 85%

Description:

Face, neck, luxury décolleté serum with snail secretion filtrate and enzyme extract of snail secretion (for a nourishing and natural anti-aging effect) and with HD effect ingredients that help to enhance the contours of the cheeks and chin, smoothing and firming the neck and décolleté. Strong point: a rich blend of active ingredients that bring brightness and improve the appearance of the skin (a complex rebalancing of the skin microbiome). Snail secretion filtrate pure and conveyed by Liposomes, obtained also through enzymatic extraction, makes the skin elastic; Tetrapeptide-2 helps counteract sagging skin. Complete the unique action of this serum the complex of antipollution algae that helps to strengthen the natural defense system against pollutants and blue light, in synergy with the up-gravity complex that helps keep the skin elastic and makes it appear with compact grain. In addition to these unique active ingredients, our serum contains medium molecular weight Hyaluronic Acid for an additional anti-aging effect, glycerine extract of biological oats and organic goji glycerine extract for a stimulating and energizing action of our skin together with an antioxidant property for the our face, neck and décolleté.

Certified product: AIAB.

Characterizing Functional Substances:

Complex UP-Gravity:

Years of exposure to environmental agents, personal habits and the physiological cellular aging alter the skin which loses elasticity and compactness. Gravity plays a special role, as a constant force that pushes the skin downward, forcing it to remain firm and elastic to prevent it from collapsing. Collagen and elastin fibers are essential components of the extracellular matrix (ECM) which together with the intracellular molecules keep the skin elastic but compact. By improving the existing elements of the skin, the loss of elasticity and compactness of the skin is reduced.

Snail Secretion Filtrate Liposomes:

They are an efficient, completely natural delivery system containing Snail secretion filtrate, used to protect and improve the effectiveness of cosmetic ingredients. Liposomes are spherical vesicles consisting of a double phospholipid layer, which can be used to facilitate penetration into the cell of water-soluble active ingredients contained in the liposome. The main ingredient of Natural Liposomes is phosphatidylcholine, the main constituent of biological membranes and this optimizes the delivery effect of our liposomes facilitating the fusion process between liposome and cell membrane, in order to release the active inside the cell.

Illuminating Mullein Flower Extract:

It is the first natural active ingredient (derived from mullein) for cosmetics based on luminescence. Its phytocomplex is able to protect the skin from harmful high-energy UV radiation, transforming it into a light source that radiates directly from the skin, making it shinier, younger and healthier.

Skin Microbiome Rebalancing Complex:

It is a combination of several components (brown algae, green algae, sea water) that provide a variety of nutrients to support biodiversity and homeostasis of the skin microbiome. Thanks to its particular varied and balanced composition it helps the skin flora to reduce redness and imperfections.

Active Water Snail Secretion :

Resulting from the enzymatic hydrolysis of snail secretion filtrate substrates in aqueous environment. Active technology of the latest generation, this technology is based on the use of a series of enzymatic-sequential biotechnological processes that allow the substrates to be broken down

specifically through targeted molecular cuts. The result is an increase in antioxidant power and an improvement in the absorption of the active substances in the derms.

Snail Secretion Filtrate:

The snail *Helix Aspersa*, produces a secretion (the mucopolisaccaride of the snail, commonly called "snail secretion") composed of active substances such as allantoin, glycolic acid, elastin, collagen and some vitamins and proteins that are very useful for the skin, in particular hydrate nourish and stimulate the formation of collagen, making the skin radiant.

Ingredients:

Snail secretion filtrate extract, Coco-caprylate, Propanediol, Citric acid, Glycerin, Cetearyl glucoside, Caprylic/capric triglyceride, Dicaprylyl carbonate, Snail secretion filtrate, Oryza sativa bran oil, Sesamum indicum oil, Hydrolyzed verbascum thapsus flower, Undaria pinnatifida extract, Avena sativa kernel extract (*), Chlorella vulgaris extract, Lycium barbarum fruit extract (*), Laminaria digitata extract, Silybum marianum ethyl ester, Acetyl tetrapeptide-2, Betaine, Aqua, Maris aqua, Tocopherol, Ascorbyl palmitate, Lecithin, Benzyl alcohol, Xanthan gum, Parfum, Sodium benzoate, Benzoic acid, Phytic acid, Potassium sorbate, Dehydroacetic acid, Phenethyl alcohol, Saccharide isomerate, Sorbitol, Caprylyl glycol, Phenoxyethanol.

(*) ingredients from organic farming

How to use:

Before applying the face cream, apply a few drops to the face, neck and décolleté, massaging with circular movements until completely absorbed.

Indication:

Cosmetic product for external use

PAO: 6M

Some slight variation in color does not represent alteration of the product but is an indication of its naturalness.

Keep out of reach of children.

Avoid contact with eyes.
